This sequence diagram describes the IP messages exchanged between the browser and servers on the internet. The message exchange presented here was obtained from an older version of EventHelix.com home page. Internet Explorer (IE) with HTTP 1.1 was used for this message trace.

This is a trace of a real page load and shows all the messages that were involved in rendering the complete page. The actual sequence of packets as seen by the browser is preserved.

<b>^HTTP Interfaces (Web Browsing)</b>				
client			internet	EventHelix.com/EventStudio 2.0
browser			net	
main thread	http thread 1	http thread 2	net	04-Jul-03 14:31 (Page 2)

HTTP GET is sent for loading the join.gif image. The TCP layer also piggy backs an acknowledgement to the HTTP\_200\_OK TCP segment received just before this
